

# JAC Products

## Corporate Quality Policy

---

It is the policy of JAC Products/Franklin Aluminum to **provide our customers with quality products and services** that meet their initial and ongoing requirements, **through continual improvement.** Continual improvement will be achieved through decreased parts per million (PPM), meeting customer delivery targets, and by incorporating customer input into our designs. In order to accomplish these goals, we have implemented a quality system which meets the requirements of ISO/TS16949.

Stephen R. Morrey  
CEO/President
